

CANESTEN ONCE PESSARY + CREAM

Thrush can affect any woman at any time. Almost 75% of all women will have at least one attack during their lifetime. And up to 1 in 3 women who are pregnant will suffer from thrush. While vaginal thrush is not a serious ailment, its symptoms can be very unpleasant and distressing.

Canesten is the most recommended brand in Australia for the treatment of vaginal thrush - an indication of its effectiveness and acceptance as the No.1 choice for vaginal thrush! There are numerous Canesten treatments available and all of them are equally

effective in treating vaginal thrush.

Canesten Once Pessary + Cream treats the infection with only one application of the pessary, and offers the benefits of being simple and convenient. The pessary treats the condition at the site of infection, while the cream assists with the relief of external irritation. Canesten ONCE Pessary contains a Category A active ingredient, meaning that it is an option for women at all stages of their pregnancy.
